

EXTRA-CURRICULAR ACTIVITIES

Extracurricular programs, which include cultural activities, are indispensable for the integral formation of students and complete campus life. Extracurricular activities are just that, extra to the curriculum. In the case of education, extracurricular activities can enhance daily-taught subject areas or individual interests. These activities could include folk and classical to contemporary dance forms and enchanting music performances, theater, crafting, speech/debate, to name a few. In a normal situation, pre COVID-19, all extracurricular activities for students took place in campus environment without many restrictions, especially protocols that involved health safety. There is a plethora of extra-curricular activities on campus which give an opportunity to the students to hone their creative skills and further enrich themselves. Participation in these activities develops team spirit and raises their level of self confidence in interacting with fellow students and peers.

Higher education institutions are confronting new challenges brought about by the present health contingency of COVID-19, ranging from the need for online educational resources to the creation of a complete extra curricular structure made possible by educational technology. As educators we owe our students the safe opportunity for extracurricular activities even during a pandemic. As offline activities were not possible during pandemic, we shifted to online mode for conduction of extracurricular activities.
